INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/011298

Box	x No. II Priority
1.	This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:
	copy of the earlier application whose priority has been claimed (Rule 66.7(a)).
	translation of the earlier application whose priority has been claimed (Rule 66.7(b)).
2.	This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.
3.	Additional observations, if necessary:

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/011298

Вох			ticle 35(2) with regard to novelty, inventive step or industrial applicability; oporting such statement	
1.	Statement			
	Novelty (N)	Claims	1-21	YES
		Claims		_ NO
	Inventive step (IS)	Claims	1-21	YES
		Claims		NO
	Industrial applicability (IA)	Claims	1-21	YES
		Claims		NO

2. Citations and explanations (Rule 70.7)

The closest prior art is known from DE-U-93 01 059, which discloses a roller according to the preamble of claim 1.

The invention addresses the problem of improving the vibration properties of rollers for the treatment of webshaped media. This problem is solved according to claim 1 in that the roller cavity is at least partially filled with a mixture of a liquid and at least one mixture partner which is formed by solid particles or another liquid, and cannot be dissolved in the liquid.

This solution is not suggested by any of the citations, which only disclose the technological background.

The subject matter of claim 1 therefore appears to be novel and inventive.

Dependent claims 2-21 contain further features of the roller as per claim 1. The subjects of claims 2-21 therefore also appear to be novel and inventive.

Industrial applicability is obvious.
